

Free Superfluous Hair Cure

A Positive Remedy That Removes Any Hairy Growth and Does Not Burn the Skin.

SENT FREE TO YOU FOR TRIAL.

It is easy now for any woman to have a beautiful face, handsome arms and bust, free from all disagreeable superfluous hair. It doesn't matter whether it's only a few hairs or a regular growth of hair, it can be removed in a few minutes with the marvelous new remedy, Electro-L. This wonderful hair destroyer can be used on the face, neck, arms, bust or any portion of the body with perfect safety. It is not like other remedies. It positively will not irritate, burn or leave the most tender skin, no matter how long it is left on, and it never fails to remove even the most obstinate growth almost instantly. If you want a permanent, lasting cure, not merely temporary relief, Electro-L is what you should use. For it goes to the hair roots and kills them. We have decided to send a trial bottle of Electro-L to any man or woman who writes for it, to prove that it does all we say, and we will refund a two-cent stamp to help cover cost of mailing. The regular sized bottle is \$1.00, and your money will be refunded if Electro-L does not do all we claim. We don't ask you to take our word for what Electro-L will do, but just fill out trial coupon below and mail with a two-cent stamp today.

FREE TREATMENT
Fill in your name and address on dotted lines below and send it to K. R. B. Co., 3005 State St., Chicago, enclosing a two-cent stamp to help cover cost of mailing, and we will send at once a free trial bottle that will show what Electro-L will do for you. **FREE.**

ALONG THE RIVER FRONT.

Arrivals.

Schooner Edith Verrill, light from a river point to await new master; tug Camilla with a tow of oyster-carrying vessels from the Potomac; ship Volante, oysters in the shell from the Wicomico river for the market; tug Kenmore with a tow of coal-laden barges from Baltimore and Philadelphia; tug Rosalie, at Shepherd's with a tow of sand and gravel-carrying lighters; schooner Hallie K., oysters in the shell to dealers; schooner E. T. Evans and Avalon, oysters from the lower Potomac beds to the local market; tug James O. Carter, from down river with wood-laden vessels; tug power ship Daisy at Alexandria, to load merchandise for Farmington, Md.; flat-tug Jack, oysters at Alexandria from Potomac beds.

Departures.

Schooner Winnie Windsor, light for a lower Potomac point to load oysters in the shell for the market here; schooner M. A. Shea, light for Aquia creek to load cord wood or lumber to the dealers here; schooner Oscar, light for a lower Potomac point to load back to this city; tug Minerva with a tow from Georgetown for a river point; schooner Magic, light for a Potomac point to load back to this city; tug S. S. Smith, light from Alexandria for the lower river to load back to this city; tug Camilla towing schooner to mouth of the river; flat-tug Milled, light for a lower river point to load back to this city; tug Southern with a tow of barges for bay points and Baltimore; schooner C. F. Hoffman, light from Georgetown to Maryland point to load cord wood back to this city.

Memoranda.

Schooner Richard Linthum sailed from New York for this city October 28; schooner Port has sailed from Aquia creek for this city with lumber aboard; schooner P. E. Smith is at Maryland point loading cord wood for the dealers here; schooner Maria Q. Terrell has sailed from Baltimore with coal for Mayport, Fla.; steamer Daniel K. Jackson has sailed from Aquia creek for this city with cord wood aboard; schooner S. B. Hubbard yesterday completed the loading of a cargo of railway ties at Alexandria and will sail today for New York; tug Howard has arrived at Baltimore with pyrites from Quantico, Va.; schooner Mary Francis is at a Potomac point loading cord wood for dealers here; schooner Grape Ship is at a Potomac point loading oysters in the shell for the market here; schooner J. P. Robinson is on Upper Machodoc creek loading for this port.

BEGINS WINTER CAMPAIGN.

Northeast Public Interest Association Elects Officers.

The Northeast Public Interest Association has organized its campaign for the fall and winter by the appointment of various committees and the election of officers. At the last meeting Rev. F. L. A. Bennett was chosen president. Other officers are Robert L. Holland, vice president; Edward Pierce, treasurer, and Henry J. Davis, secretary. The committee chairmen appointed are as follows: Confederation of citizens' associations, F. L. A. Bennett; schools, F. L. A. Bennett; streets, W. D. D. Nye; public order, Samuel W. Watson; sanitation, Dr. P. W. Price; publicity, J. R. F. Browne. The association has indicated the reputation of several citizens who are interested in having dentists appointed as inspectors in the schools, and the school children's teeth was presented to the association by Dr. Clifford Fry and Dr. Andrew J. Gwathey.

"77"

Humphreys' Seventy-Seven Breaks up Grip and Colds

COLDS

A Good Remedy.

For Coughs, Colds, Grip, Influenza, Cold-in-the-Head and Sore Throat "Seventy-seven" is a good remedy; can be relied upon to give prompt relief. "Seventy-seven" acts directly on the sick part, without disturbing the rest of the system.

"Seventy-seven" is free from all habit-forming drugs, is harmless; only doing good, never harm.

A small vial of pleasant pellets fits the vest pocket. At all dealers in medicine, 25c, or mailed.

TO BE OPEN SUNDAYS

National Museum Will Start Plan Next Year.

SUBMITS TO PUBLIC WISH

Deferred Until All Exhibits Are Installed in New Home.

ART GALLERY ANNOUNCEMENT

Paintings by American Artists to Be Placed Before Open Sundays Begin There.

The long-looked-for opening of the National Museum to the public Sundays is to be realized at last.

Washingtonians whose work prevents them from going to the museum on week days will soon be given an opportunity to do so on their day of rest.

Announcement was made yesterday by officials of the museum that the new building of the National Museum would be kept open to the public Sundays, though probably not until after February 1st. They are particularly anxious that the general public should have the benefit of treasures which the government has amassed and placed in the museum and which are a liberal education in themselves.

Agitation in favor of keeping the museum open Sunday was begun months ago. The movement met an answering chord of sympathy in the officials of the museum.

But doubt was expressed whether the appropriation for the museum would allow the big building to be kept open on days extra days during the year. Matters have been so arranged, however, that a positive announcement can be made that the plan for the Sunday opening will go through.

No effort is being made at present for Sunday opening merely because the great majority of exhibits have not been installed in the new building. Only a part of one floor has been filled.

The work of removing the exhibits from the old to the new building is going along as rapidly as possible, but has been held up somewhat until the proper cases can be finished.

It is expected that the museum will be kept open also at night later on, though this innovation will not be made until some time after the building has been opened Sunday.

Art Gallery Defers Opening.

Sunday opening of the Corcoran Gallery of Art has been postponed from the first Sunday in November until December 18. From December 18 the gallery will be open Sunday from 12:30 o'clock until 5 o'clock in the afternoon.

The postponement of the Sunday opening has been made necessary to permit the installation of the third identical exhibition of contemporary American art paintings. The installation of this exhibition will be begun about November 15, and the opening of the gallery decided not to begin the Sunday openings, since they could not be continued.

The entire gallery will be closed from November 15 until December 13, when the exhibition of the American art paintings is opened. All the permanent exhibits of the gallery must be removed from their places, some 350 pictures, and about 40 oil paintings and numbers twenty-seven.

Practically all the best American painters in oil will have pictures hung in this exhibition. The exhibition is the work of living American artists. Two years ago more than 125,000 persons visited the exhibition by the American painters, and pictures valued at more than \$100,000 were sold by the artists as a direct result of the exhibition.

Kappa Sigma was organized at George Washington University in 1905, with a membership of forty-seven students. The chapter is one of the largest in the country, and is the property of the fraternity. The installation exercises, to be held at the fraternity house, will be followed by a banquet at Ranscher's.

KAPPA SIGMA TAKEN IN.

Becomes Chapter of Alpha Beta Phi Fraternity.

Kappa Sigma, a fraternity of George Washington University, will be installed as a chapter of the Alpha Beta Phi Fraternity Tuesday.

The right to be installed as a chapter of the national fraternity was granted Alpha Beta Phi at the grand convocation of Alpha Beta Phi at Denver last summer.

The installation committee consists of John P. Brooks, Washington, chairman; Hamline Horn, Washington; and Lee Thomas Haller Johnson, Washington and Jefferson; S. Lendar White, University of Virginia; and A. S. Garland of the University of Pennsylvania.

Alpha Beta Phi was organized at the University of Wisconsin in 1884. The present roll of chapters numbers twenty-seven. Expansion is one of the policies of the organization.

Kappa Sigma was organized at George Washington University in 1905, with a membership of forty-seven students. The chapter is one of the largest in the country, and is the property of the fraternity. The installation exercises, to be held at the fraternity house, will be followed by a banquet at Ranscher's.

ATHLETICS IN SCHOOLS.

Proposed to Make Participation Possible for Every Normal Boy.

To start a plan of school athletics in which every normal boy can enter with a chance of gaining considerable benefit and distinction without having to strive for the highest kind of records is the aim of the founders of the Public School Athletic League for the colored schools in the District. The board of education has granted permission to E. B. Henderson, 406 U Street northwest, to organize the league, and a meeting of school officials interested will be called some day this week.

The league will have two kinds of members, those who will take an active athletic part and teachers and older members who will supervise and govern the games.

For the present year the people interested in the formation of the league intend to stick to games between various schools, basketball and football. Next year it is believed that an intensive form of athletics will be carried out, in which the boys shall train for various standard of athletic ability and shall receive rewards in the form of letters for individual attainments. The records to be reached will not be too high for an ordinary healthy boy. In this way it is hoped that athletics will appeal to the mass of boys instead of merely to record-breakers.

CITIZENS TO CELEBRATE.

Special Exercises Upon Completion of Benning School Building.

When the four-room addition to the William Benning School is turned over to the Commissioners, the Benning Citizens' Association will celebrate the event with appropriate exercises.

The contractor expects to have the school ready for use November 15.

Campaign Against Profanity.

A campaign against profanity will be inaugurated by the Interdenominational Bible College, at a special session to be held at the Walker Memorial Church, 13th street between U and V streets northwest, this evening at 8 o'clock. Addresses will be delivered by Rev. J. E. Gordon, Rev. Sterling N. Brown, Prof. Jesse Lawson, Mrs. B. R. Dorsey and James L. Neill.

Saks & Company

MEN'S FINE SUITS

At One-third and One-half Their Actual Value.

That's certainly radical reduction—but it is a fact. The loss isn't ours. It's the maker's—and he has sacrificed not alone his profit, but liberally of his cost in turning over these Suits to us at the price he did—enabling us to give you the greatest values we have ever given you.

\$20, \$25, \$28 & \$30 Suits,

Choice \$14.50 Every Suit

for \$4.50 Guaranteed

The patterns are exceptionally attractive—in just the shadings that are most fashionable—Browns and Grays, with darker colors that make the assortment complete. The models are full of style and the fit is excellent. It isn't fair to the garments that they should be offered at any such price; but conditions alter prices—and you enjoy the benefit of it. There are all sizes for Men and Young Men.

TWO REMARKABLE VALUES IN BOYS' SUITS.

Here are two special lots of Boys' Knickerbocker Suits that will give service to the full expectation of their worth price. We are offering them at about half—because we can—another turn of the commercial wheel that we were on hand to take advantage of.

Boys' Cheviot and Cassimere Double-breasted Knickerbocker Suits; all seams strongly sewed. Neat patterns and full cut. All sizes.

They are \$3 and \$3.50 values.

Boys' All-wool Cheviot and Cassimere Knickerbocker Suits; pants full lined; seams silk sewed. You get such woollens as these in the \$7.50 and \$8.00 Suits.

They are \$7.50 and \$8 values.

Special Sale of KNITTED SILK SCARFS.

\$1.50, \$2 and \$2.50 Values, 69c 3 for \$2.00

Take our advice and pick out at least three. You haven't had a chance like this before. They are pure silk and all silk.

—in Two-toned Effects.
—in Accordion Plaids.
—in Solid Colors.
—in Stripes and Mottles.

Full-length—in the fashionable widths—and every Scarf of the entire too dozen absolutely perfect.

Special Sale of MEN'S PURE SILK HOSE.

Regular \$1 Quality, 65c a Pair. 6 for \$3.75.

You want to note that these are THREAD SILK HOSE and not mercerized nor spun silk. And because they are THREAD SILK they will wear equal to the fine cottons and lises. The assortment of colors is complete—five shades—Black, Navy Blue, Gray, Tan and Lisle—and there's a full line of sizes.

Here's another chance for you to stock up and make a commodity of what has heretofore been a luxury.

FISHING IN THE SOUTH BRANCH OF THE POTOMAC.

Fishing in the south branch of the Potomac, in Hampshire county, W. Va., has been exceptionally good this season, according to a story told by Earl Godwin, a Washingtonian, who has just returned from that region. Several five-pounders have been caught, he says, and especially large were the strings brought in by anglers in the early part of the season.

Mr. Godwin made his headquarters at Romney during most of the three weeks last summer. Beginning with the first week in October, scarcely a bass would bite on anything but crawfish. This, it is believed, is probably because the river bottom was rather dirty, and a minnow would be lost in it. When a bass found minnow the bait would be so entangled in the muddy moss and river bottom grass that the big fish would simply toy with it.

However, constant fishing brought results every day. The south branch is of the wary kind and difficult to catch in the east, and although fishermen find they have to live the life of a pioneer and camper, it is one of the most attractive within a day's distance of the capital.

William H. Callahan gave the fish in Lake Smith, near Norfolk, a trial a few days ago. He not only found fish enough

to give him a good day's sport, but he also caught the big fish of the season. The fish was a bass, and he was very happy to catch it.

Lake Smith has the reputation of being one of the most attractive fishing places in the United States, anglers who have been there never failing to find plenty of fish, and Mr. Callahan exhibited the idea of taking a supply of live smelt with him.

"Where did you get your bait?" was the first question asked him by persons at the lake, who had never before seen the attractive little fish. Mr. Callahan was unfortunately unable to lose four dozen of the six dozen he took with him, but with what he had left he caught a dozen fine bass and half as many pike.

The fish were caught in the eastern end of the twenty-mile stretch of fresh water so near the ocean, and the angler had plenty of room to play the bass. He felt so well repaid for his trouble that he will be but a short time before he will give the fishing place another trial.

Patrick Riordan is one of the many who regret that the fishing season is soon to end. He has spent many days on the Potomac and Shenandoah rivers this fall and has a number of good strings of bass to his credit.

Like a number of other Washington anglers, Mr. Riordan does his fishing in the West Virginia, usually Saturdays or Mondays, dropping to the Maryland waters Sunday to prevent clashing with the game wardens or officers in West Virginia.

"They turn your pockets inside out when they catch you in West Virginia with fishing or gunning outfit in your possession Sunday," Riordan says, "and for that reason I keep away from there Sundays."

Last Sunday, he added, he learned what happened to a resident of the vicinity of Harpers Ferry because of his failure to comply with the provisions of the law, and he is going to take no chances in that state.

Mr. Riordan fished at Millerville one day

COAL FROM THE COAST

TO HAVE TEST BY NAVY

Steammaking Qualities Carefully Noted.

Two Vessels Will Be Utilized and

Considerable interest is being shown in the tests to be made with coal mined on the Pacific coast with a view to its more general use on the ships of the navy. It is represented that this coal is equal in steaming qualities and for naval use to the fuel which is purchased under contract in the east. Naval engineers have entertained some doubts on the subject. While the western coal has its undoubted merit, it has been pointed out by those responsible for the maintenance of speed that it is of military importance to have the best possible coal in order that there may be no hindrance to the speed of war vessels.

In order to settle the question of the adaptability of Pacific coast coal for naval use, it has been arranged that as soon as the target practice of the Pacific fleet has been completed two of the vessels—The Maryland and the West Virginia—shall be used in the competition. The Maryland will be loaded with western coal, carefully weighed, while the West Virginia will burn eastern coal in the same quantity. The two vessels will steam together over a measured course, and the comparison will be made as to the speed, endurance and other essential features. Several brands of western coal will be burned. The material is now in San Francisco awaiting transfer to the naval vessels. A careful record will be kept, and it will be easy to determine whether the western coal is equal to the eastern product.

SEEKS TO STOP SALE OF BONDS.

Mrs. Yerkes Wants Executors of Husband's Estate Enjoined.

NEW YORK, October 29.—Mrs. Mary Adelaide Yerkes, widow of Charles T. Yerkes, filed suit in the supreme court today asking for an injunction restraining the Central Trust Company, the Bank of America, Speyer & Co. and L. S. Owley, executor of her husband's estate, from disposing of \$4,494,000 par value of 4½ per cent bonds of the Chicago Consolidated Traction Company, which formed part of the estate. She alleges that the bonds are about to be sold at 30 per cent of their face value, and that the sale is in violation of the agreement made with her when she surrendered her interest in the Yerkes 5th avenue residence.

The suit is similar to one brought in Chicago.

DISMANTLED BY HURRICANE.

Steamer Speaks Schooner Which Was Drifting With Current.

MOBILE, Ala., October 28.—The Norwegian fruit steamer Angella, Boca del Toro to Mobile, reported speaking the three-masted schooner Harrison T. Beacham, Mobile to Porto Rican ports, in latitude 22-40 north, longitude 87-10 west, dismantled by the recent hurricane. She had rigged up a small spar and awning for a sail and was drifting with the current. The deck cargo had been carried away, hatches blown off and the holds were full of water. The Angella provisioned her.

Laymen's Missionary Movement.

The laymen's missionary conference will be held in this city November 7 and 8, according to an announcement made yesterday. The meeting will be held in the lecture room of the New York Avenue Presbyterian Church. The list of speakers will include Dr. W. E. Lampe, Col. E. W. Halford, S. Earle Taylor, David M. Conaughy, Dr. George F. Pentecost and J. Campbell White. Three delegates will be appointed by each church to attend the conference.

Boy's Condition Still Serious.

Register Martin, the small boy who fell from the third story of a new building near 9th and E streets northwest Wednesday, was in a semi-conscious condition at Emergency Hospital last night. His skull is fractured and he has several minor cuts and bruises. His condition shows an improvement, although he is not yet out of danger.

Is Your Health Worth 10c?

That's what it costs to get a week's treatment of CASCARETS. They do more for you than any medicine on Earth. Sickens generally shows its attack first in the Bowels and Liver; CASCARETS cure these ills. It's so easy to try—why not start tonight and have help in the morning?

CASCARETS are a box for a week's treatment, all druggists. Biggest seller in the world. Millions boast a month.

Dr. S. F. Acree Talks to Chemists.

"Organic Chemistry" was the topic of Dr. S. F. Acree, in his address to the Physical Chemistry Club at the first fall meeting at the University Club last night.

The Physical Chemistry Club, which is more or less unique in that it is made up of chemists, is composed of scientists of Washington. All meetings are given over to scientific discussions.

The next meeting will be held at the University Club November 17. H. E. Patton of the bureau of soils, Department of Agriculture, will deliver an address.
